

## Shared Baskets

Users may opt to share their baskets from the **Previous Baskets** function from the menu. This will make the list of variables associated with each basket visible to other users. The intention is that users may create pre-prepared lists of variables commonly used in different types of studies.

### Level 2 Access - Shared Baskets

| User      | Project ID                    | ProjectDescription                            |
|-----------|-------------------------------|-----------------------------------------------|
| a.sudlow  | <a href="#">1g252pzzox7tr</a> | Smoking habits - preliminary study            |
| a.wong    | <a href="#">vkx215ioi5kg</a>  | Primary school reading project                |
| d.gaysina | <a href="#">1em58e6rcsfeo</a> | Early health problems and worry in later life |
